

NC910S

10 Zone Master Call Controller c/w 300mA PSU (Surface Version)

Overview

Compatible with C-TEC's entire range of 800 Series field devices.

Housed in an attractive surface mounting plastic enclosure measuring just 214mm x178mm

Two call levels - standard (constant tone) and emergency (intermittent tone).

Optional mute and call accept/reset buttons.

Call Accept' functionality allows staff to send an intermittent call acknowledgment signal to calling zones to confirm help is on the way (dependent on wiring and field devices used).

Includes a 12V 300mA PSU and 2volt-free relay contacts which activate on a standard or emergency call.

Innovative slide-in labelling system.

Zones can be wired in 4 or 6 core (7/02) stranded security cable.

Additional master controllers and expansion units available for use as repeaters on larger sites.

Optional boxed PSUs c/wwith space for a 12V VRLA battery available for sites where a standby battery facility is required.

NC920S

20 Zone Master Call Controller c/w 300mA PSU (Surface Version)

Overview

Compatible with C-TEC's entire range of 800 Series field devices.

Housed in an attractive surface mounting plastic enclosure measuring just 214mm x178mm

Two call levels - standard (constant tone) and emergency (intermittent tone).

Call Accept' functionality allows staff to send an intermittent call acknowledgment signal to calling zones to confirm help is on the way (dependent on wiring and field devices used).

Includes a 12V 300mA PSU and 2volt-free relay contacts which activate on a standard or emergency call.

Innovative slide-in labelling system.

Zones can be wired in 4 or 6 core (7/02) stranded security cable.

Additional master controllers and expansion units available for use as repeaters on larger sites.

Optional boxed PSUs c/wwith space for a 12V VRLA battery available for sites where a standby battery facility is required.

10-20 Zone Expansion Unit for NC910S or NC920S

Part No. **NC910ES, NC920ES**

- Expands the number of zones on an NC910S or NC920S Call Controller by 10 or 20 zones (dependent on model purchased).
- Housed in an attractive surface mounting plastic enclosure measuring just 214mm x 178mm.
- Includes 10 or 20 Zonal Alarm LEDs capable of indicating Standard and Emergency Calls. Note this expansion controller does not include on board buzzer as audible call indication will come from the master controller it is connected to.
- NC910ES provides 10 extra zones, NC920ES provides 20 extra zones.
- Innovative slide-in labelling system.
